Summary

Final year AI/ML student at VIT Bhopal with hands-on experience building and deploying production ML systems across healthcare and smart infrastructure domains. Skilled in end-to-end model development — from data preprocessing and training to live Streamlit deployment. Seeking ML engineering or data science roles where I can apply real technical depth and grow alongside industry practitioners.

Education

Vellore Institute of Technology, Bhopal

Bhopal, India

Integrated M.Tech – Artificial Intelligence & Machine Learning

Oct 2022 – Oct 2027

– Relevant Coursework: Deep Learning, Computer Vision, Natural Language Processing, Statistical Modeling

Technical Skills

Languages: Python, R, C, C++, SQL

ML / DL Frameworks: TensorFlow, PyTorch, Scikit-Learn, YOLOv8, OpenCV, HuggingFace Transformers

Data & Visualization: NumPy, Pandas, Matplotlib, Seaborn, Plotly

Deployment & APIs: Streamlit, Flask, FastAPI, REST APIs

Databases & Cloud: MySQL, AWS (EC2, S3), Google Colab

Dev Tools: Git, GitHub, Jupyter Notebook, VS Code, CVAT

Experience

Intern

Summer 2025

S. S. Heavy Equipments Pvt. Ltd.

India

- Processed and analyzed **10,000+ equipment performance records** using Python, Pandas, and NumPy, uncovering failure patterns that reduced manual inspection planning time by ~25%.
- Built data visualization dashboards in Matplotlib enabling data-driven maintenance decisions, cutting equipment downtime identification time by ~30%.
- Applied statistical modeling to predictive maintenance datasets; collaborated with engineering teams to translate findings into actionable equipment optimization recommendations.

Projects

NovaGen – Health Risk Predictor | Scikit-Learn, Streamlit, Pandas, Joblib | [Live](#) · [GitHub](#)

2025

- Built a binary health risk classifier trained on **22 clinical features** (BMI, cholesterol, glucose, stress, lifestyle) using a Scikit-Learn pipeline with StandardScaler, serialized via Joblib.
- Deployed as a live Streamlit web app with real-time inference and risk categorization, achieving **~91% accuracy** on held-out test data.

Traffic Handler – Smart Signal Optimizer | Scikit-Learn, Streamlit, NumPy | [Live](#) · [GitHub](#)

2025

- Trained an ML regression model on the real-world **METR-LA dataset** (207 road sensors, Los Angeles) using lag features, rolling density means, and temporal signals to predict near-future traffic density.
- Built a Streamlit app with a density-proportional green signal allocation algorithm across 4 lanes, dynamically distributing a 120-second signal cycle based on live congestion inputs.

Loan Approval Predictor | Scikit-Learn, Streamlit, Pandas | [Live](#) · [GitHub](#)

2024

- Built and deployed a binary classification model predicting loan approval from applicant financial and demographic features, served live on Streamlit with an interactive real-time prediction UI.

Extracurricular Activities

Technical Team Member

2023 – 2024

E-Cell, VIT Bhopal

Bhopal, India

- Contributed as an active technical member driving innovation initiatives, supporting startup ecosystems, and organizing events that bridged technology and entrepreneurship within the university.

Core Member

2023 – 2025

Marathi Club, VIT Bhopal

Bhopal, India

- Managed and executed large-scale cultural festivals and workshops with a combined audience of **2,000+**, coordinating logistics and cross-team collaboration across multiple events.

Certifications

Smart India Hackathon (SIH) — Internal Round Qualifier, VIT Bhopal (2024)

Applied Machine Learning in Python – University of Michigan (Coursera)

Machine Learning Bootcamp – Microsoft Learn Student Ambassadors
